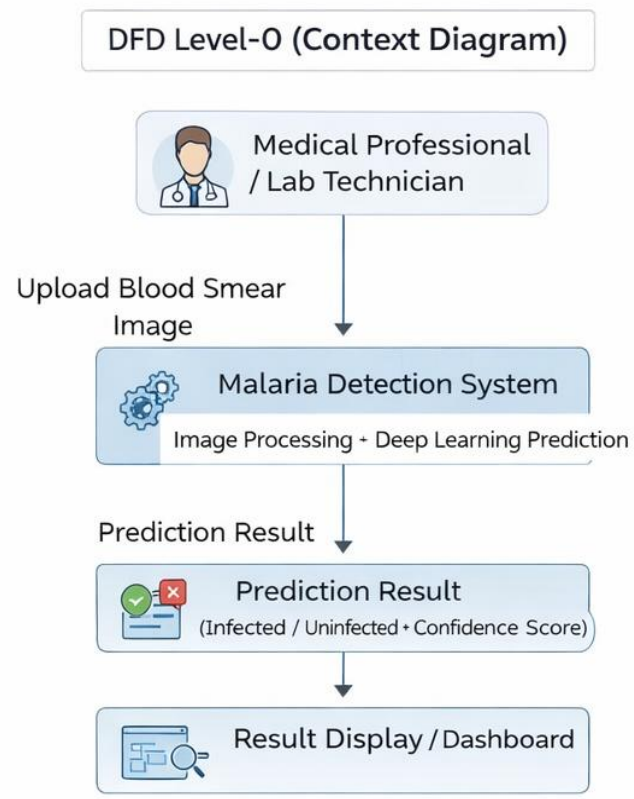
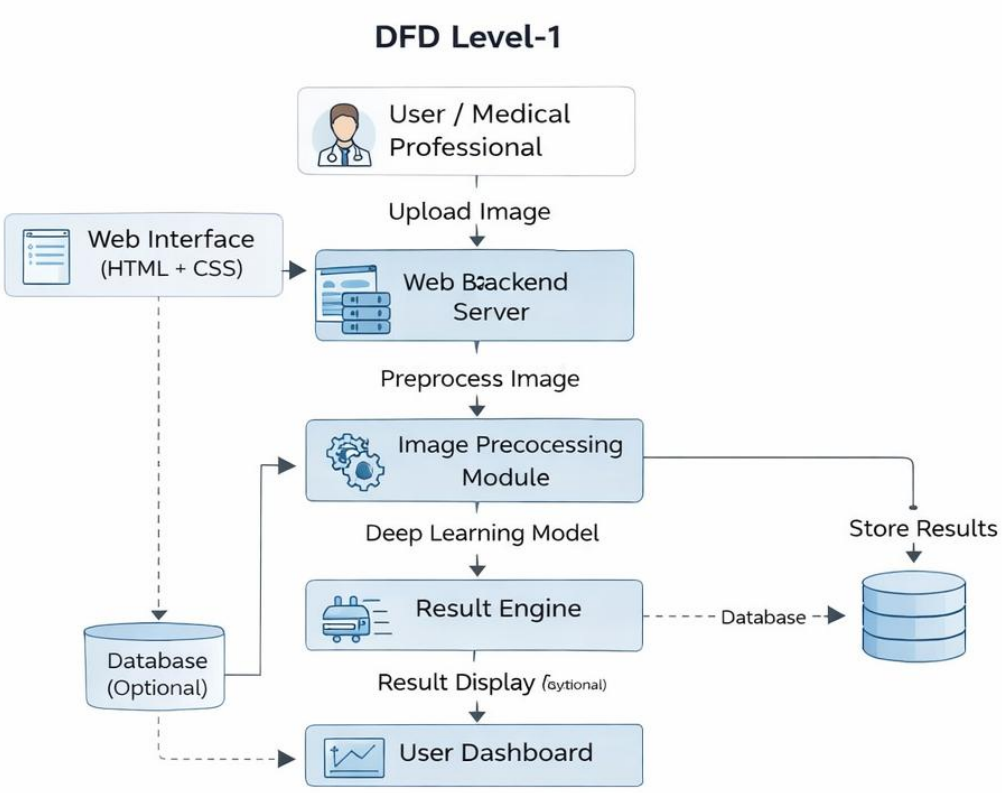
Project Design Phase-II
Data Flow Diagram & User Stories

Date	9 March 2026
Project Name	Malaria Detection using Deep Learning
Maximum Marks	4 Marks

Data Flow Diagrams:





User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Medical Professional	Image Upload	USN-1	As a user, I can upload a blood smear image for malaria detection.	The system accepts image upload successfully.	High	Sprint-1
Medical Professional	Image Processing	USN-2	As a user, I want the system to preprocess the uploaded image automatically.	The image is resized and prepared for model input.	High	Sprint-1
Medical Professional	Malaria Detection	USN-3	As a user, I want the system to analyse the uploaded image using AI.	The deep learning model processes the image and detects malaria.	High	Sprint-1
Medical Professional	Prediction Result	USN-4	As a user, I want to see whether the image is infected or uninfected.	The system displays classification results.	High	Sprint-1
Medical Professional	Confidence Score	USN-5	As a user, I want to see the confidence score of the prediction.	The result includes prediction probability.	Medium	Sprint-2
Medical Professional	Dashboard	USN-6	As a user, I want to view previous detection results on a dashboard.	The system displays analysis history.	Medium	Sprint-2
Administrator	System Monitoring	USN-7	As an administrator, I want to monitor system performance and predictions.	Admin can access system analytics.	Low	Sprint-3
